CURRENT POSITION	School of AI Convergence, Soongsil University, Seoul, South Korea Assistant professor Principal Investigator of Human-Centered Language and Data Intelligence (HUMANE) Lab.	Mar. 2021 - Present
RESEARCH INTEREST	Language Intelligence    Data Science    AI for Social Good    Computational Social Science  My interdisciplinary research lies at the intersection of language intelligence, data science, and social science. I am broadly interested in addressing societal challenges, with recent work focusing on misinformation and social bias, issues that can be propagated by both humans and generative AI. To tackle these challenges, we formulate technical problems through dataset curation, develop language-oriented AI methods aligned with human perspectives, and apply these methods to real-world data. My work has been published in leading venues in NLP, data science, and interdisciplinary research, including ACL, WWW, and ICWSM.
